Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called [Enabling data model fields](#) in the *Veeva Network Online Help*.

New languages

The following languages are now supported for Network data model fields and reference codes. They are not supported for the Network UI.

- Indonesian (ID)
- Filipino/Tagalog (TL)
- Malay (MS)
- Thai (TH)
- Vietnamese (VI)

This enhancement is enabled in your Network instance by default. The languages will be available in the 22R3.0 Production release.

Select a new language for reference codes and data model fields

1. On the Network menu bar, click **My Profile**.
2. In the **Settings** section, expand the **Language** list and select a language.
3. **Apply** your changes.

Field updates for Asia Pacific

These fields will be automatically added to standard profile layouts, but they must be added to any custom profile layouts that you have created for these countries or regions.

Korea

The following field has been added to the Parent HCO object for Korea:

- `role__v` – Role of entity at the HCO.

This is an existing field so it will not be managed by Veeva OpenData by default.

International name field

The `international_name__v` field has been added to the HCO and HCP objects for the following countries:

- Indonesia (ID)
- Malaysia (MY)
- Philippines (PH)
- Thailand (TH)
- Vietnam (VN)

This is an existing field, so it will not be managed by Veeva OpenData by default.

Field updates for Europe

These fields will be automatically added to standard profile layouts, but they must be added to any custom profile layouts that you have created for these countries.

Serbia

The following field has been added to the HCP object:

- `broj_id__v` – Identifier for pharmacists in Serbia. Issuing Body: The Pharmaceutical Chamber of Serbia.

This is a new ID field so it will be managed by Veeva OpenData by default.

Tax ID field

The `vat_id__v` (Value Added Tax ID) field has been added to the HCO object for the following countries:

- Estonia (EE)
- Latvia (LV)
- Lichtenstein (LI)
- Lithuania (LT)
- Switzerland (CH)

This is an existing field, so it will not be managed by Veeva OpenData by default.

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

ALL COUNTRIES
