Veeva Network 23R1.1.1 Data Governance

June 2023

Contents

Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called Adding Veeva OpenData fields in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

 For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called Enabling data model fields in the *Veeva Network Online Help*.

Data Governance document updates

The following change has been made to the Data Governance document since it was published for the Early release.

- **Key Network Field** - The `key_hco_network_alias__v` field will not be added to the HCO object for all countries (except ZZ countries) in Network version 23R1.1. It will be added in a later release.

All material in the Data Governance document should be reviewed to ensure that updates are noted.

Field updates for all countries

Premise field

The following field has been added to the Address object for all countries (including countries that use the ZZ data model)

- `premise_extra__v` – Premise Extra.

This field holds information that could be present as part of the Premise field. It is used by Network's third-party address cleansing service to obtain a complete delivery address.
This is a new field so it will be managed by Veeva OpenData by default. It is enabled by default and cannot be disabled.

This field will not be added to standard profile layouts. You can add it to any custom profile layouts that you have created for these countries or regions.

CRM hashtag field

The following field has been added to HCP and HCO objects for all countries (except countries that use the ZZ data model):

- `crm_hashtags__v` – Network Bridge use only. Field should only be enabled if Network cannot be used to manage CRM Account Identifier or if CRM hashtags need to be stored in a different CRM field. Field exports empty values for target subscription and reporting.

This field is not enabled by default. Administrators can enable the field in the Network Data Model.
This is a new field so it will be managed by Veeva OpenData by default. The field is read-only. It cannot be changed through data change requests.

This field will not be added to standard profile layouts because it is used only for the Network Bridge.

Field updates for Asia Pacific

Indonesia

The following fields have been added or changed in the Indonesian data model.

The `license_number__v` field name is now **Nomor Surat Tanda Registrasi (STR)**. Previously, the name was **Lisensi**.

The following fields have been added to the License object:

- `initial_board_license_date__v` – Date license was first granted by the state licensing board.
- `expiration_date__v` – Expiration date for the license.

The following field has been added to the HCP object:

- `grad_school__v` – Name of graduation school.

These License and HCP fields existed previously and might be used for customer-managed data in this country, so they will not be automatically managed by Veeva OpenData. For more information, see the section called *Adding new fields to your OpenData subscription*.
The fields will be automatically added to standard profile layouts. They must be added to any custom profile layouts that you have created for these countries or regions.

Field updates for EMEA

Tax fields

The `hco_tax_id__v` field has been added to the HCO object for the following countries:

- Bosnia & Herzegovina (BA)
- Estonia (EE)
- Latvia (LV)
- Lithuania (LT)
- Montenegro (ME)
- Serbia (RS)

The `hcp_tax_id__v` field has been added to the HCP object for the following countries:

- Bosnia & Herzegovina (BA)
- Montenegro (ME)
- North Macedonia (MK)
- Serbia (RS)

These tax fields existed previously and might be used for customer-managed data in this country, so they will not be automatically managed by Veeva OpenData. For more information, see the section called *Adding new fields to your OpenData subscription*.

The fields will be automatically added to standard profile layouts. They must be added to any custom profile layouts that you have created for these countries or regions.

Tax field label updates

The labels for the following tax fields are updated for Italy.

Object	Field	Previous Label for Italy	New Label for Italy
HCO	hco_tax_id__v	Codice fiscal	Partita IVA
HCP	hcp_tax_id__v	ID imposta	Codice Fiscale

Austria

The following field has been added to the HCP object:

- `registration_id__v` – Alphanumeric Registration ID.

This field existed previously and might be used for customer-managed data in this country, so it will not be automatically managed by Veeva OpenData. For more information, see the section called *Adding new fields to your OpenData subscription*.

The field will be automatically added to standard profile layouts. It must be added to any custom profile layouts that you have created for these countries or regions.

Bulgaria

The following field has been added to the HCP and HCO objects:

- `international_name__v` – Name of HCP/HCO in Latin based alphabet. Used for visualization and cross international regions business purposes for communications with users that do not have the ability to read non-Latin alphabet based language.

This field existed previously and might be used for customer-managed data in this country, so it will not be automatically managed by Veeva OpenData. For more information, see the section called *Adding new fields to your OpenData subscription*.

The field will be automatically added to standard profile layouts. It must be added to any custom profile layouts that you have created for these countries or regions.

Field updates for China

Fields have been added to the following regions or countries that are managed by the China Veeva OpenData team:

- Hong Kong (HK)
- Macao (MO)
- Taiwan (TW)

The following fields have been added to the HCP object:

- `professional_title__v` – Professional title.
- `academic_title__v` – Academic title.

These fields existed previously and might be used for customer-managed data in this country, so they will not be automatically managed by Veeva OpenData. For more information, see the section called *Adding new fields to your OpenData subscription*.

The fields will be automatically added to standard profile layouts. They must be added to any custom profile layouts that you have created for these countries or regions.

Field updates for Latin America

Argentina

The following field has been added to the HCO object:

- `gln_id__v` – Global Location Number. Unique ID for delivery address.

This field existed previously and might be used for customer-managed data in this country, so it will not be automatically managed by Veeva OpenData. For more information, see the section called *Adding new fields to your OpenData subscription*.

The field will be automatically added to standard profile layouts. It must be added to any custom profile layouts that you have created for these countries or regions.
