

Veeva Network 23R1.1.2 Patch Release Notes

June 2023

### Contents

Enhancements in this release	3
New data model field	3
Unlocking your Network account	3
Unlock your account	4

#### **Enhancements in this release**

The following enhancements are included in this release.

#### **NEW DATA MODEL FIELD**

The following field has been added to the Address object for South Korea:

• neighborhood\_code\_\_v - Numerical code representing a neighborhood or district within a larger administrative unit, such as a city.

This is a new field, so it will be managed by Veeva OpenData by default.

The field will be enabled by default in new Network instances. Administrators can enable it in their existing instances.

## **UNLOCKING YOUR NETWORK ACCOUNT**

For security, users are locked out of Network after five failed consecutive login attempts. To regain access to Network, you can now unlock your own account.

This option is supported for active users that do not use single sign-on.

Forgot your password?	
Your account has been to account by checking you administrator, or resetting	ecked out. You can unlock your email, contacting your Network your password.

This enhancement is enabled by default in your Network instance.

# Unlock your account

Previously, to regain access to Network again, you had to reset your password. Now, you can unlock your account and continue to use your current password.

After you are locked out of your account, you will receive an email containing your username and your Network instance.

Veeva Network		
Ģ	Account Locked	
You com serv	r Network account has been locked due to too many consecutive failed login attempts. If you feel your account has been apromised, please notify your Network administrator and reset your password immediately. Otherwise you can go to the self vice link below and unlock your account.	
Use Inst	r Name: <u>cyril.standard@verteo.com</u> ance URL: <u>verteo.com</u>	
This	link expires in 24 hours.
