## Data governance

---

The data governance document describes data changes introduced in this release as of the publication date of this document.

### Adding new fields to your Veeva OpenData subscription

---

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network Online Help*.

### Enabling Veeva OpenData fields for extended use

---

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called [Enabling data model fields](#) in the *Veeva Network Online Help*.

### Data Governance document updates

---

No changes have been made to the Data Governance document since it was published for the Sandbox release.

## Updates to field lengths

---

Field lengths are updated for the following fields in the Network data model and applicable reporting tables.

| Field                     | Previous Field Length | New Field Length |
|---------------------------|-----------------------|------------------|
| custom_key_entity_type__v | 10                    | 200              |
| entity_type__v            | 10                    | 200              |

**Note:** All field lengths are suggestions; they are not enforced in Veeva Network.

## Field updates for EMEA

---

### **Registration ID**

The `registration_id__v` field has been added to the HCP object for the following countries:

- Israel (IL)
- South Africa (ZA)

This field existed previously and might be used for customer-managed data in these countries, so it will not be automatically managed by Veeva OpenData. For more information, see the section called *Adding new fields to your OpenData subscription*.

The field will be automatically added to standard profile layouts. It must be added to any custom profile layouts that you have created for these countries or regions.

## Global data updates

The following sections describe reference data considerations and updates for applicable regions.

### ALGERIA

The following changes have been applied:

| Object   | Field                             | Reference Type | Code | Description (EN)                      | Translation |
|----------|-----------------------------------|----------------|------|---------------------------------------|-------------|
| HCO      | hco_type__v                       | HCOType        | 1_21 | Hospital, Oncology                    |             |
|          |                                   |                | 4_42 | Company Practice                      |             |
|          |                                   |                | 4_55 | Organization, Dept at Clinic          |             |
|          |                                   |                | 4_56 | Hospital, Teaching and University     |             |
|          |                                   |                | 4_91 | Organization, Single Private Practice |             |
| HCP, HCO | specialty_1__v to specialty_10__v | Specialty      | DYS  | Dialysis                              |             |
|          |                                   |                | GMED | General Medicine                      |             |
|          |                                   |                | HE   | Histology and Embryology              |             |
|          |                                   |                | PA   | Clinical Pharmacology                 |             |

### ANDORRA

The following changes have been applied:

| Object         | Field  | Reference Type | Code     | Description (EN)    | Translation                        |
|----------------|--|----------------|----------|---------------------|------------------------------------|
| HCP, ParentHCO | primary_relation_type__v, relationship_type__v | RelationType   | PHARTECH | Pharmacy Technician | Técnico en farmacia y parafarmacia |

## ARGENTINA

The following changes have been applied:

| Object         | Field  | Reference Type | Code   | Description (EN)                  | Translation               |
|----------------|--|----------------|--------|-----------------------------------|---------------------------|
| HCP, HCO       | specialty_1__v to specialty_10__v              | Specialty      | OPT    | Optometry                         |                           |
|                |  |                | PDE    | Pediatric Endocrinology           | Endocrinología Pediátrica |
|                |  |                | PDI    | Pediatric Infectious Disease      | Infectología Pediátrica   |
|                |  |                | POD    | Podiatry                          |                           |
|                |  |                | WAMZA  | Wild Animal Medicine, Zoo Animals | Zootecnia                 |

## Global data inactivations

---

The following sections list reference codes that have been inactivated by Veeva OpenData for the countries listed. Veeva OpenData does not use these codes in their data; you may choose to update reference code mappings accordingly unless they are required by your own data.

### BELGIUM

The following changes have been applied:

| Object | Field    | Reference Type | Code | Description (EN) |
|--------|----------|----------------|------|------------------|
| HCP    | prefix_v | HCPPrefix      | DRF  | Doctor (Female)  |
|        |          |                | MISS | Miss             |

### CAMEROON

The following changes have been applied:

| Object | Field                                     | Reference Type | Code   | Description (EN)          |
|--------|---|----------------|--------|---------------------------|
| HCP    | hcp_focus_area_1_v to hcp_focus_area_36_v | HCPFocusArea   | ACUP   | Acupuncture               |
|        |   |                | ALLERG | Allergology               |
|        |   |                | ANALY  | Psychoanalysis            |
|        |   |                | DIAB   | Diabetology               |
|        |   |                | DIET   | Dietetics                 |
|        |   |                | DNTH   | Dental Hygiene            |
|        |   |                | GASTRO | Gastroenterologic Surgery |

| Object | Field | Reference Type | Code    | Description (EN) |
