Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called Adding Veeva OpenData fields in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called Enabling data model fields in the *Veeva Network Online Help*.

Data Governance document updates

No changes have been made to the Data Governance document since it was published for the Sandbox release.

Field updates for all countries

Match support

The following fields can now be used to configure match rules:

- `record_owner_type__v`
- `record_owner_name__v`

This update is supported for all objects.

Field updates for EMEA

International Name field

The `international_name__v` field has been added to the HCP and HCO objects for the following countries:

- Cyprus (CY)
- Israel (IL)

Additional field details	
Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for these countries.

Field updates for Asia Pacific

Singapore

The following field has been added for the HCP and HCO objects:

- `international_name__v`

Additional field details	
Managed by OpenData?	No. This is an existing field, so it will not be managed by OpenData by default.
Immediate data impact?	No. Enabling this field in your Network instance will not result in immediate data updates.
Profile layouts	The field is automatically added to standard profile layouts. It must be added to custom profile layouts created for this country.

Field updates for Latin America

Data privacy fields

The following fields have been enabled for all countries managed by the LatAm OpenData team. This includes Mexico and all countries in Central America, the Caribbean, and South America. The fields were previously enabled only for Brazil.

- `data_privacy_opt_out__v` - Used to indicate if HCP has directed OpenData to opt them out.
- `data_privacy_opt_out_date__v` – Date this record was opted out by Opendata

Additional field details	
Managed by OpenData by default?	Yes, these are system fields that are managed by Veeva OpenData. The fields are read-only in customer instances.
Immediate data impact?	No. Enabling these fields in your Network instance will not result in immediate data updates.
Profile layouts	The fields are automatically added to standard profile layouts. They must be added to custom profile layouts created for this country/ region.

Global data updates

The following sections describe reference data considerations and updates for applicable regions.

All Countries

The following changes have been applied:
