

Veeva Global Support Policy

Overview

This Veeva Support Policy applies to all Veeva product offerings. The policy applies to support provided by Veeva as part of the product offering acquired by you under your Master Support Agreement (MSA). Product support is subject to the terms and conditions of the MSA. The services and or policies referenced in your MSA may further describe the support delivered by Veeva specific to the product offering acquired by you under your order. Product support does not include services for any Veeva service offering or program that is not expressly provided by Veeva as part of the product offering under your MSA. As used in this Support policy, "you" and "your" refers to the entity that has purchased products from Veeva. This support policy is subject to change at Veeva's discretion.

Support Terms

Support Fees

The fees paid by you for the Veeva product offering under your contract includes the product support described in this policy.

Support Period

Product support is effective during the term of your subscription for use of Veeva products. Veeva is not obligated to provide product support beyond this term of your subscription.

Technical Contacts

Your administrators are the sole liaisons between you and Veeva for support of the products. The admins must be knowledgeable about the Veeva products and your environment in order to help resolve system issues and to assist Veeva in analyzing and resolving support tickets. When submitting a ticket, your admins should have a baseline understanding of the problem and an ability to reproduce it, in order to assist Veeva in diagnosing and triaging. Veeva may review service requests logged by your admins and may recommend specific training to help avoid service requests that would be prevented by such instruction.

First and Second Line Support

Customer Responsibility:

With the exception of PromoMats, MedComms, CDMS, SiteVault, Vault Submissions Publishing, Engage Connect and MyVeeva, you are expected to establish and maintain the organization and processes to provide "first line support" for the products directly to your end users. First line support shall include but not be limited to (i) a direct response to users with respect to inquiries concerning the performance, functionality, or operation of the product(s), (ii) a direct response to users with respect to problems or issues with the product(s), (iii) a diagnosis of problems or issues of the product(s), and (iv) a resolution of problems or issues with the product(s). If after reasonable efforts you are unable to diagnose or resolve problems or issues of the product(s), only your admins may contact Veeva for "second line support."

Veeva Responsibility:

First line support shall only be provided to PromoMats, MedComms, CDMS, SiteVault, Vault Submissions Publishing, Engage Connect and MyVeeva customers. Support shall consist of advice on PromoMats, MedComms, CDMS, SiteVault, Vault Submissions Publishing, Engage Connect and MyVeeva product functionality, troubleshooting and Veeva internal escalations for all end users.

Second line support shall consist of (i) a diagnosis of problems or issues with the product(s), and (ii) reasonable commercial efforts to resolve reported and verifiable errors in the product(s) so that the

product(s) performs in all material respects as described in the associated program documentation. Veeva may review service requests logged by your technical contacts and may recommend specific process changes to assist you with the practices described in this Product Support policy.

[Access to Customer Environments](#)

Veeva Support is permitted to only access customer data per the customer MSA, or with explicit customer consent. Veeva Support treats the opening of a customer ticket as consent to allow Veeva Support to provide support services to a customer, and access relevant customer data only for the purposes of troubleshooting or providing support.

Veeva Global Service Center

[Veeva Global Service Center consists of:](#)

- First Line Support for Vault PromoMats, MedComms, CDMS Suite, SiteVault, Vault Submissions Publishing, Engage Connect and MyVeeva
- First line support includes but is not limited to (i) a direct response to users with respect to inquiries concerning the performance, functionality, or operation of the product(s), (ii) a direct response to users with respect to problems or issues with the product(s), (iii) a diagnosis of problems or issues of the product(s), and (iv) a resolution of problems or issues with the product(s).
- Escalation to Product Support
- 24/7 support via phone, portal, email and chat

Veeva Product Support

[Veeva Product support consists of:](#)

- Second line support
- Product updates, fixes, security alerts, and critical patch updates
- General releases, limited releases (where applicable), maintenance releases, and documentation updates
- Assistance with support requests in accordance with agreed upon Service Level Agreement (SLA)
- Access to [Veeva.com/support](https://veeva.com/support) (24/7 web-based support portal), including the ability to log support requests online.

Supported Products

Veeva uses a unified and consistent release naming scheme across all Veeva product lines. Product Release names use the following format:

2 digits of year + R + sequence number for release within the year.

Example: **17R1**

This change makes it easier to correlate related versions across product lines as many customers are now using Veeva's pre-integrated solutions. This change is effective for all releases occurring in calendar year 2017 and moving forward.

There is an associated technical release name so that it uniquely identifies a given patch. Technical release names use the following format:

Veeva Systems – Public

3 nodes separated by a dot → **major.patch.hot fix**. In the example below, it shows the 10th patch of the 17R1 major release.

Example: **17R1.10.0**

The Veeva Products include:

- [Veeva Vault](#)
- [Veeva Network](#)
- [Veeva CRM](#)
- [Veeva Align](#)

For **Vault**, most functionality is available when using Mobile Safari on iPad. Some functionality is not supported as listed in the [Vault Help documentation](#).

For **CRM**, the supported portable tablet devices are listed:

- [iOS support policy](#)
- [Windows OS and device requirements](#)

Contacting Veeva Global Service Center

Veeva Global Service Center can be reached in the following ways:

- Through email
- Through portal
- Through Chat
- Telephone

Contact Details: <https://www.veeva.com/services/gsc-contact/>

Support Hours

Support for PromoMats, MedComms, CDMS Suite, SiteVault, Vault Submissions Publishing, Engage Connect and MyVeeva for Patients users is available 24/7

Response Times

A Global Service Center Associate will use reasonable endeavors to respond to the ticket reporter via the Support Portal within the time frame defined in the table below.

Priority	Definition	First response
Urgent (P1)	<ul style="list-style-type: none">• Urgent production issue affecting all users, including system unavailability and data integrity issues with no workaround available.	1 hour
High	<ul style="list-style-type: none">• Major functionality is impacted, or significant performance degradation is experienced.• Issue is persistent and affects many and/or major functionality.• No reasonable workaround available.	2 hours

Normal	<ul style="list-style-type: none"> System performance issue or bug affecting some users (but not all). 	3 hours
Low	Routine Service Requests includes: <ul style="list-style-type: none"> How-to queries Product functionality Escalations Registrations and User Management 	4 hours

Contacting Veeva Product Support

Veeva Product Support can be reached in the following ways:

- Through the customer Support Portal: [Veeva.com/support](https://veeva.com/support)
- Veeva Service Status Portal: Veeva maintains a service status portal, which customers can access at: trust.veeva.com ("Veeva Trust Site"). The Veeva Trust Site provides alerts regarding general service status, incidents, announcements, and current availability across Veeva's product infrastructure, but is not a customer-specific availability measure. Customers may subscribe to RSS feeds available on the site to receive automated service-related notifications. To make a claim for failure to meet the SLA reflected in your contract, follow the procedure outlined in your contract.
- Phone Support: The following numbers could be used to report outages or speak to the Veeva support engineer currently assigned to work on your tickets. Please note that when reporting an outage via phone, while we will start the investigation immediately, you may be directed to Veeva Support Portal to provide detailed information so we can better track, follow-up and resolve your issue. Phone support cannot be used to open a new ticket.

Regional Phone Numbers

Support Hours

Support business hours are regionally defined. Support for customers' Veeva administrators is available during the following times:

US hours: 8 a.m. – 8 p.m. ET
 EU hours: 9 a.m. – 6 p.m. CEST
 APAC hours: 9 a.m. – 6 p.m. CST

The overlap of these hours allows a follow the sun support model covering the hours of Midnight (12 a.m.) Monday to 8 p.m. Friday US ET. Product support is closed or may operate on a limited capacity during selected Veeva holidays. Off-hour product support is available during all periods in which product support is closed or limited. Off-hour product support: Alternate notification systems, such as voice mail, email and texts received on mobile phones are used as a backup when product support engineers are assisting other customers or are otherwise not available. A product support engineer is available for level 1 issues 24 hours per day, seven days per week through the alternate notification systems, including on holidays.

Response Times

Problems reported through the product support portal receive an automated email confirmation and ticket number. A product support engineer will respond to the ticket reporter via the support portal within the time frame defined in the table below.

Priority	Definition	First response
Urgent	<p>Urgent production issue affecting all users, including system unavailability and data integrity issues with no workaround available.</p> <ul style="list-style-type: none"> The production application is not available. The application is in production and malfunctions such that a significant portion of users cannot perform their daily tasks and there is no reasonable workaround. The application has a security related error that is considered a high risk. 	1 hour 24x7x365
High	<ul style="list-style-type: none"> Major functionality is impacted or significant performance degradation is experienced. Issue is persistent and affects many users and/or major functionality No reasonable workaround available 	4 business hours
Normal	<ul style="list-style-type: none"> System performance issue or bug affecting some but not all users. Short-term workaround is available, but not scalable. Also includes time-sensitive requests such as requests for feature activation or a data export. 	1 business day
Low	<ul style="list-style-type: none"> Inquiry regarding a routine technical issue that affects a small number of users. Information requested on application capabilities, navigation, installation, or configuration. Reasonable workaround available. Resolution required as soon as reasonably practicable. 	2 business days

Escalation Process

If an issue needs to be escalated for any reason, please follow this process:

Click the “Escalate” button available in the ticket view of the support portal.

- The appropriate Sr. Support Engineer and Product Support Manger will be notified, acknowledge the ticket escalation and provide next steps in the comments.

For further escalations, request contact from support management via the ticket comments, and you will be contacted directly.

Escalation path is as follows:

- Product Support Manager

- Regional Support Director
- Global Support VP
- SVP of Customer services

Out of Scope

The following items are considered out of scope for standard Veeva Product Support:

- Configuration changes and testing configuration.
- Training/how to sessions.
- Password resets (this is self service).
- Modify customer data.
- Build, debug, or minify Multichannel Content, Closed Loop Marketing (CLM) content, Approved Email (AE), Engage, CoBrowse, Vault Java SDK code
- Setting up reports.
- Data work - Assigning territories, creating new accounts, loading data, etc.
