Data governance

The data governance document describes data changes introduced in this release as of the publication date of this document.

Adding new fields to your Veeva OpenData subscription

When Veeva OpenData adds new fields to a country that you are subscribed to, you can add the field to the subscription so that it's ready to receive data and be managed by Veeva OpenData.

For information about adding new Veeva OpenData fields to your subscription, see the topic called [Adding Veeva OpenData fields](#) in the *Veeva Network Online Help*.

Enabling Veeva OpenData fields for extended use

Veeva OpenData fields can be enabled to load local data or third party data. A field can be managed by Veeva in some countries, managed by a third party source in other countries, or be owned by a customer in the remaining countries.

Administrators can view ownership of the data model fields, by country, in the Network user interface by navigating to **Data Model** and choosing the **Customer Master** data domain. Click **Export Data Model** or select an object to view specific field details.

For more information about enabling Veeva OpenData fields for local or third party data use, see the topic called [Enabling data model fields](#) in the *Veeva Network Online Help*.

FIELD UPDATES FOR EUROPE

The fields will be automatically added to standard profile layouts, but it must be added to any custom profile layouts that you have created for these countries or regions.

Professional Activity Mode

The `professional_activity_mode__v` field has been added to the HCP object for the following countries:

- Belgium (BE)
- Luxembourg (LU)

This is an existing field, so it is not managed by Veeva OpenData by default.

Registration ID - HCP

The `registration_id__v` field has been added to the HCP object for the following countries:

- Estonia (EE)
- Latvia (LV)
- Lithuania (LT)

This is an existing field, so it is not managed by Veeva OpenData by default.

Registration ID - HCO

The `registration_id__v` field has been added to the HCO object for the following countries:

- Portugal (PT)

This is an existing field, so it is not managed by Veeva OpenData by default.

Healthcare Provider ID fields

The following read-only healthcare provider ID fields have been added:

- `healthcare_provider_id__v` (HCP and HCO object)
- `healthcare_provider_id_2__v` (HCO object)

The fields have been added to the following countries:

- Estonia (EE)
- Latvia (LV)
- Lithuania (LT)

These are existing fields, so they are not managed by Veeva OpenData by default.

FIELD UPDATES FOR ASIA PACIFIC

The fields will be automatically added to standard profile layouts, but they must be added to any custom profile layouts that you have created for these countries.

These field updates apply to the following countries:

- Australia (AU)
- Singapore (SG)
- South Korea (KR)

These existing fields have been added for the Parent HCO object:

- email_1__v
- fax_1__v to fax_3__v
- phone_1__v to phone_4__v

These existing fields have been added for the HCO object:

- fax_1__v to fax_3__v

These are existing fields so they are not managed by Veeva OpenData by default.
